The Problem

"Child safety seats, when installed and used correctly, can prevent injuries and save lives. Yet, hundreds of children ride unrestrained each day. And, of the children 14 and under who have been killed in auto crashes, 50% were not using their seat belts or child safety seats."

Who should Attend

Utah Child Safety Seat Program Coordinators, Law enforcement, fire and EMS personnel, health care professionals, and other child passenger safety advocates. Participants need to be committed to child passenger safety.

Purpose

Child passenger safety has become increasingly complex. The need for people with a high level of knowledge and a standardized set of qualifications has grown. The National Highway Traffic Safety Administration (NHTSA) standardized course for technical specialists will increase your knowledge and hands-on practice enabling you to:

- Develop child passenger safety technical skills;
- Identify and correct misuse of child restraints;
- Serve as a community/state/organization resource;
- Educate others on child passenger safety issues;
- Reduce potential liability through standardization;
- Receive knowledge and skills to meet national certification requirements.

Attendance Requirement

Attendance for entire 40 hours is required.

Registration

Total cost is \$120 and includes:

- SAFE KIDS Certification Fee/Manual--\$60
- Utah Course Registration Fee--\$60
